

PLEASE JOIN US FOR THE ANNUAL
MARK THOMLISON MEMORIAL GOLF TOURNAMENT
 JUNE 26TH, 2011

WHAT IS AMYLOIDOSIS?

Amyloidosis is a rare and potentially fatal disease that occurs when substances called amyloid proteins build up in organs and tissues, impairing their function.

On February 28, 2009, Amyloidosis took the life of our beloved Mark Thomlison at the age of 36. He was a husband and a father to two young sons. The disease went undiagnosed and now our goal is to raise funds to support the fight against Amyloidosis.

Your participation and sponsorship in the golf tournament is greatly appreciated! Thank you for your support.
